

## **About the prices**

Defining prices was a difficult thing ! As we are Swiss, we have to consider the normal price for our country, which covers production costs and allows us to live. This price is 20 CHF.

However, we know that Switzerland has much higher prices than many other countries, and we don't want people from abroad who like our music to not be able to buy our CD because it's too expensive compared to the prices in their country. So we decided to split prices into two categories :

- one for Switzerland, which is the "normal" price ;
- and one for abroad, a bit lower.

The shipping changes in the other way because it's of course more expensive for us to ship abroad than in Switzerland.

We hope that this is clear and seems logical for everyone !
